Level-2 (DOM JS)

Level-2 (DOM JS)

1. Sadə kalkulyator

<input type="text"/>	<input type="text"/>	<input type="button" value="+"/>	<input type="button" value="-"/>	<input type="button" value="*"/>	<input type="button" value="/"/>
----------------------	----------------------	----------------------------------	----------------------------------	----------------------------------	----------------------------------

Level-2 (DOM JS)

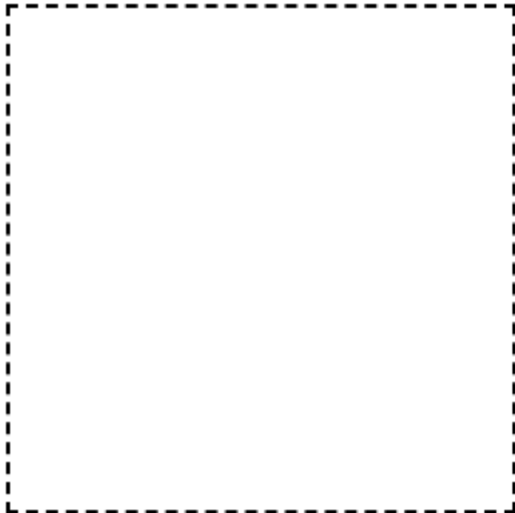

2. Inputa daxil edilmiş sözü tərsinə çevirən proqram

Level-2 (DOM JS)

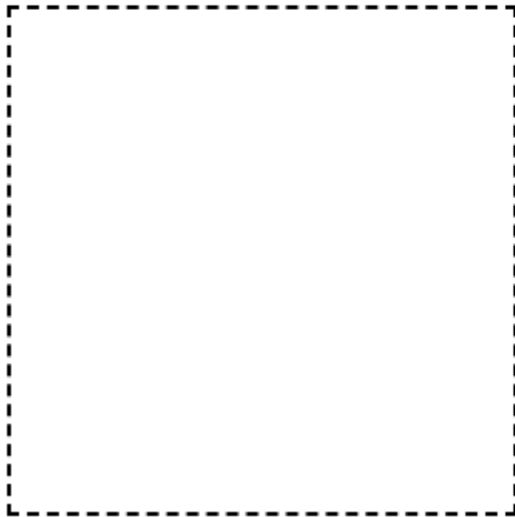

3. Divin dizaynını dəyişin

<input type="text" value="width"/>	<input type="text" value="height"/>	<input type="text" value="border width"/>		
<input type="text" value="Border style ▼"/>	<input type="text" value="Border color ▼"/>	<input type="text" value="color ▼"/>	<input type="text" value="BackGround color ▼"/>	<input type="button" value="Ok"/>

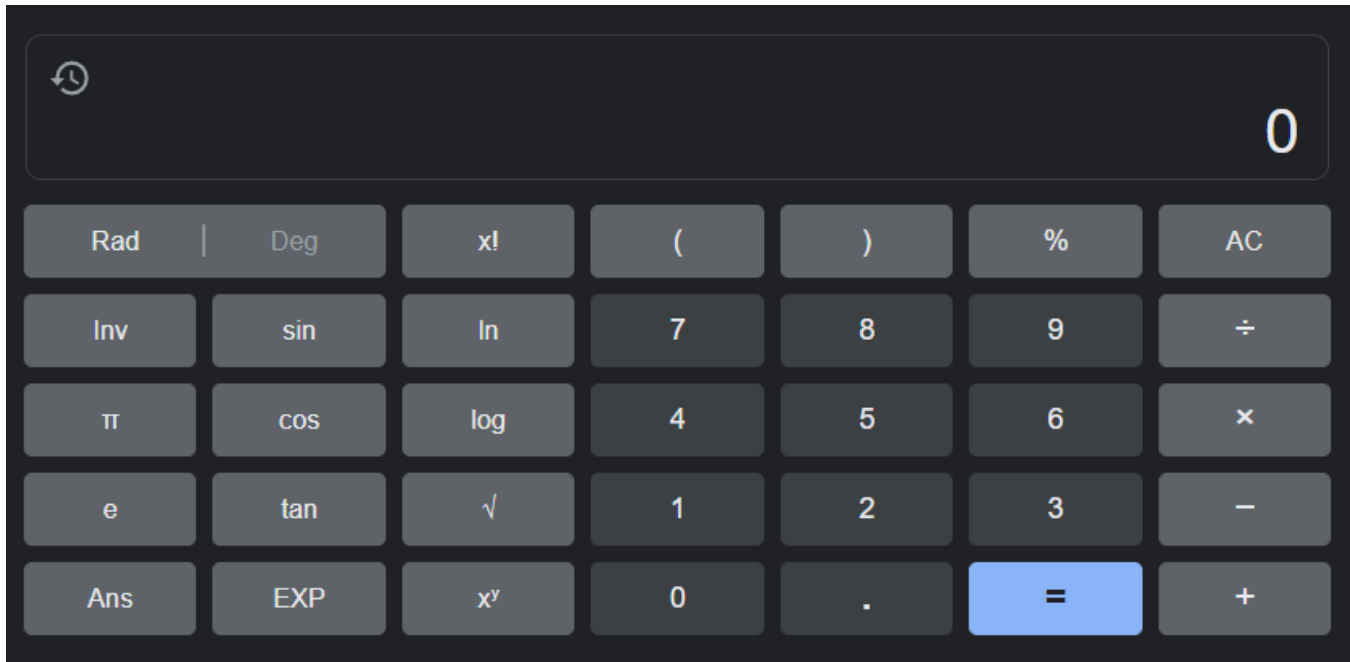

Level-2 (DOM JS)

4. Div-in width-i 200 px-dir. Width üçün təyin olunan inputa daxil olunan qiymət qədər div-in width-ni artırın. Məs: inputa 50 daxil olunarsa div-in width-i 250px olmalıdır
